To whom it may concern

Reference for Mr Edward Bowes

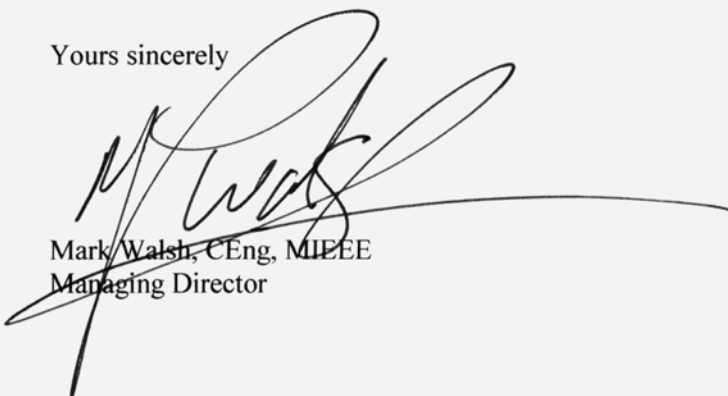

I have known Edward for almost 10 years. PCT has used his services as a toolmaker and those of his companies: Bowes Engineering & Sealed Enclosures extensively over this period for the manufacture of mechanical components (metallic and non-metallic). This has involved the design and manufacture of complex tools and fixtures as well as precision housings and components for the manufacture of sophisticated sonar equipment operating at full ocean depth

Edward Bowes is a first class engineer with extensive experience and deep understanding of mechanical design, tooling and component manufacture. His insight and experience has undoubtedly improved our products and saved us from costly mistakes on many occasions.

Edward is a most decent and honest man who always conducts himself in a professional, fair and friendly manner. He recognises the importance of good relations in business and builds these naturally with ease because of his sound character and technical competence.

I am delighted to have been asked to provide a reference for Edward and wish him every success for the future.

Yours sincerely

Mark Walsh, CEng, MIEEE
Managing Director
